REASON FOR ALLOWANCE

3. **Claims 42-58 are allowed. Claims 1-41 have been cancelled.**

4. As argued by the applicant in the amendment filed on 6/15/2006. On page 1 of remarks paragraph 4-5 and following pages after that "wherein the backlight unit repeats lighting and extinguishing a backlight at a constant refresh rate such that a lighting time period is shorter for a motion picture image with a fast moving subject captured than for a motion picture image with a slow moving subject captured and the motion picture images have an identical frame rate" The limitation which applicant has argued is not met/taught by the reference in combination with other limitation of claim 42 and 51 is not taught by reference of prior art or any other prior art of records.

5. The prior art fails to teach or suggest a liquid display device having a liquid crystal display panel and a backlight unit, **wherein the backlight unit repeats lighting**

and extinguishing a backlight at a constant refresh rate such that a lighting time period is shorter for a motion picture image with a fast-moving subject captured therein than for a motion picture image with a slow-moving subject captured therein and the motion picture images have an identical frame rate as claimed in claim 42.

The prior art fails to teach or suggest a liquid display device having a liquid crystal display panel and a backlight unit, wherein the **backlight unit controls a backlight to maintain lighting at a constant light amplitude for a still picture image with a non-moving subject captured therein, and repeats lighting and extinguishing for a moving picture image with a moving subject captured therein and the still and moving picture images have an identical frame rate** as claimed in claim 51.
